

Microsoft Azure Women's Hackathon

Theme: Invent tech-based solutions for women empowerment in India.

Problem Statement: Build solution to enable Economic Freedom For Women.

Team Name: Ardor

Team Leader: Sonia Singh

IDEA

- To build a platform where a women can look up for a job.
- Platforms that help people finding the jobs already exists but they are just for skilled professionals.
- No such platform exist that provides a facility to find the job to a women regardless of the fact whether she is a homemaker or a skilled women.
- The idea is to create a platform that notifies about each and every kind of a job (from stitching, salon related to senior software developer) to all the women out there.
